

BRIEF MENTION.

Mrs. Blackmer offers a liberal reward for the recovery of a gold breastpin lost last Sunday evening.

Mr. Farr is grading his lot, on the Main street, in this city, preparatory to rebuilding his family residence thereon.

Mrs. McGinnis left last Sunday for Lakeport, Lake county, California, where she will remain about a month.

D. H. Jackson has obtained a foreclosure of his lien on the property of the Amazon and Glasgow Mining Companies.

A new bank is being organized in Virginia. Mr. White, until recently of the Virginia Savings Bank, will be the cashier.

Mr. Lane, of Virginia City, and one of the recreant Assemblymen, has hied him to Bodie, where he intends to reside in future.

The peach, apple and pear trees in this county are blossoming finely, and the vegetables are already sprouting and growing rapidly.

John W. Mackay contemplates making a two years' tour of the world, and will probably start on his journey early next October.

Papers containing accounts of Mr. Kenyon's death were received in this city, yesterday, from Mrs. Kenyon. This ought to settle any lingering doubts as to his demise.

George Cook is still running the McJilton arastra on ore from the Cook & Gray mine. The capacity of the arastra being only one ton per day, Mr. Cook contemplates the erection of a mill of his own, at an early day.

William Pierce, the murderer who escaped from the Esmeralda county jail, a couple of months ago, and who was recaptured in Silver City, Idaho, some days since, has been brought back to Aurora, where he will be tried without unnecessary delay.

George Barton has commenced to run his coach from Suto to Virginia, by way of Dayton and Silver, every day. He has the most comfortable vehicle on the line, and will doubtless make a success of his venture. For rates of fare and other details, see his advertisement.

Frank Sperling came down from Virginia yesterday, he having arrived from San Francisco in the morning. He looks as cheerful as ever, and is confident that a better time is coming for this "camp." To that end he will contribute by starting up a mine or two soon.

Eastern capital is being enlisted to develop the claim of the London Mining and Milling Company, which is situated in American ravine, in this city. The company has recently organized with a Board of nine Directors, five of whom are well-known capitalists of New York city, the remaining four being of San Francisco. In order to procure the necessary working capital 5,000 shares of stock will be sold for \$2 50 per share. As soon as this is placed, work will be resumed at the mine.

The Recent Surface Discovery.
Some thirty-five tons of ore are being extracted daily from the recent surface discovery at the south end of the Justice ground. The new engine and cage put in last week are working well, and have enabled the Silver Hill company to begin drifting south toward their ground, where the bulk of the bonanza is believed to lay. It is not known, as yet, that this ore will pay for working, as the Pappoose mill, which has been crushing it, was only cleaned up yesterday.

A Successful Practitioner.
"Dr. Spinney & Co.," of No. 11 Kearney street, San Francisco, advertises his specialties under the head of "New To-Day." The gentleman is a regular practitioner, a graduate of Harvard College and Bellevue Hospital, and is meeting with very great success. If you have any ailment which he treats you should write to, or go and see him at once. His charges are moderate, and his treatment is all but infallible.

Notices for Sale.
Printed notices of "This House for Rent" and "Furnished Rooms to Let" are for sale at this office. Price, 25 cents each.

THE SUTRO COMPROMISE.

THE ARRANGEMENT PERFECTED AND THE PAPERS SIGNED.

Conditions of the Agreement—The Drain to Be Completed Within Ninety Days—Course of the Lateral Drifts—The Royalty Reduced to \$1 per Ton on \$40 Ore—Etc.

The compromise between the Suto Tunnel Company and the various mining companies of the main Comstock lode, has been definitely ratified by the parties interested, and is now in force. The general provisions of the agreement on the subject are identical in all, and are in effect as follows:

The preamble recites the original agreement entered into in March 1866 with the Gould & Curry Silver Mining Company, and declares that all the mines on the Comstock lode are beneficially interested in the speedy completion of the lateral tunnels and are desirous of adjusting all their differences.

Article 1st of the agreement declares that the terms of the original agreement have been complied with by each party.

Article 2d provides that the main tunnel is considered as constructed according to the terms of the original agreement, but provides for the construction of a covered drain to carry off all water of whatever temperature within ninety days.

Article 3d provides that until the end of ninety days no water shall be discharged into the tunnel, but that after that period, or sooner if the drain is ready, the mines shall be at liberty to pump any water into the tunnel, including water used in the mines for propelling power.

Article 4th provides for the construction of lateral tunnels—one to the north, running first to about one hundred feet west of the C. & C. shaft, thence to about one hundred feet east of the Sierra Nevada shaft, and thence to about five hundred feet east of the Utah shaft. The one to the south shall begin at the Julia shaft, which is already connected with the main tunnel, and run to about eighty feet east of the Yellow Jacket shaft, and thence to about two hundred feet west of the new Overman shaft. These lateral tunnels are to be begun within ninety days, to be well constructed, eight feet wide by seven feet high, and to be pushed ahead with due diligence.

Article 5th makes provision for deducting from the regular course of the lateral tunnels in case unfavorable ground is encountered.

Article 6th sets forth that the mining companies agree to advance \$70 per foot for the lateral tunnels, payments to be made at that rate on the 5th day of each month for work done during the preceding calendar month. Each of the companies has the right to construct lateral tunnels before its own claim, and receive credit therefor at the same rate.

Article 7th provides for the repayment of these advances by allowing the mining companies to deduct one half of the monthly charges on ore reduced or sold, until the amount advanced is paid.

Article 8th provides for the reduction of charges from \$2 to \$1 per ton on ore yielding not over \$40 per ton of 2,000 pounds.

Article 9th provides that the mines between the California on the north and the Chollar-Potosi on the south, shall be considered drained whenever the tunnel is ready to receive water from the mines now connected with it. The mines north of the California or south of the Chollar-Potosi are to be considered drained as soon as the lateral tunnels reach their respective centers.

Article 10th provides for the mining companies furnishing a sworn return of their product each month at each mill, with the actual yield in bullion, and for the payment of charges thereon, by the 10th day of each succeeding month.

Article 11th provides that no mine shall allow any other mine which has no agreement to discharge its water so that it could be pumped into the tunnel.

Article 12th provides for the construction of an outside parallel drain, if it shall at any time become necessary.

Article 13th provides that all the agreements are to be deemed to be of the same purport.

Article 14th declares all articles to be binding upon each party and their successors or assigns, etc.

Looks Like Old Times.

Six stages now go through this city between the hours of 9 in the morning and 4 in the afternoon. They are generally well loaded, both ways, with the exception of the Aurora and Bodie stage, which goes crowded, but rarely brings back over five passengers. This begins to look like ante-railroad times, and it makes the early settler's heart leap with joy.

Born.
In Dayton, Saturday, March 29th, to the wife of D. Swart, a son.

—A REALLY neat tramp, when he puts a piece of custard pie in his inside coat pocket, always places the outside or crust rim in first, allowing the central point of the triangle to gracefully hang over the edge, after the manner of a baudans handkerchief.

THE AMERICAN LABOR UNION.

An Organization Which Aims to Promote Employment for All Caucasians Born on the North American Continent in Preference to Others.

A new organization called the American Labor Union has been formed in Eureka, this State, the objects of which are set forth in the preamble and resolutions which follow:

WHEREAS, The native-born citizens of America have by their lack of union, inertia and apathy, and not by reason of any mental or moral inferiority, permitted a monopoly of all the leading industries to pass into the hands of the monopolies which employ aliens, many of whom are not far removed from peons; and

WHEREAS, The restless and independent spirit of Americans has caused them to, at all times, desire to better their condition, a desire which frequently causes them to make an injudicious change of home; and

WHEREAS, They have selected this locality in large numbers, and whose wants seem to be overlooked by those who have the employment of labor, and who monopolize the industries of the country; and

WHEREAS, All labor being honorable, and many Americans being here idle, and willing to labor at any kind of legitimate work or employment; therefore be it

Resolved, That we mutually band ourselves together in an organization to be known as the American Labor Union. The object of this Union shall be the protection of American labor and industry, helping the unemployed and aiding and assisting its members to procure employment, elevating the working classes, encouraging the discouraged and hopeless, and maintaining the dignity of labor, and, above all, to inculcate in the young men of our country a supreme contempt for idleness and dissipation. Any Caucasian born on the North American Continent, and who speaks our mother tongue, may become a member of this Union. Any one having resided continuously in the country twenty-one years may become a member.

Fatal Affray Between Ex-Silver-Ites.

The telegraph informs us that at 3 o'clock last Friday afternoon a fatal stabbing affray took place near the junction of Pine and Broad streets, Nevada City, Cal., in which M. L. Russell killed Robert McCue. Both parties are miners and had worked together several months ago, at which time the trouble between them commenced and which had been brewing ever since. At the time mentioned, while under the influence of liquor, McCue assaulted and knocked Russell down and sprang on him, and while continuing his blows Russell drew a knife and stabbed McCue to the heart. McCue expired in ten minutes. Russell immediately surrendered himself to the officers and was lodged in jail.

McCue and Russell resided here for some years. McCue boarded at the Stone House for a long time, and Russell was employed at the Buckeye mine. Hon. C. C. Stevenson held him in high esteem, and assisted him in various ways. Both were quiet men, but McCue (who was a Canadian Orangeman) was apt to be ugly when under the influence of liquor, and any disrespectful allusion to Orangism in his hearing invariably led to a fight. Russell is from Ohio, but still looks upon Silver as his home, and owns a house and lot here.

Summit Steam Boiler Works

On the Divide, next door to Summit Stables, VIRGINIA, NEVADA.

G. ERNEST BELMOR PROPRIETOR.
